Thanks Paula,

We were actually trying to avoid the repeat in Denver, since the last National HRM Meeting was there in 2012. We're also looking at Albuquerque/Sante Fe. Tuscon was in 2006. We've had specialty

conferences in Reno in the past but the powers-to-be are worried about appearances thanks to our friends in GSA. So we are walking kind of a tightrope here. Nevertheless, I appreciate your thoughts about this.

Doug

FYI – the annual SME meeting is being held in SLC in February. Might seem like a repeat to schedule the NMConference there a couple of months later.

Shahid & Doug - I have been listening in on the call today and would like to be included on your email list for the mining issues. I have assumed the RPM responsibilities for the non-NPL site – Upper Animas River basin in the San Juan County in SW Colorado – near Silverton, Co.

I am interested in the link on the 13 TI sites on the intranet that was mentioned as well as more information about the National Mining Conference as it evolves. I'm working with the local stakeholder's group at the Upper Animas who is very involved in the investigation and reclamation of mine sites in the Upper Animas basin. They are continually looking for new passive treatment technologies (as well as \$\$\$). I'd like to ask if there will be any opportunities for "scholarships" to attend the mining conference for members of the public such as these local stakeholders who have invested a great deal of their own time over the last 17+ years to address the water quality of the Upper Animas basin.

Thanks.
